

BCASBiomed

DENTAL SERVICES

One Stop Solution

Design

BCAS Biomed offers a full design and consultancy service for Primary Care, NHS-affiliated and private dentists. Whether you are building a brand new decontamination room or modifying existing facilities to accommodate the new HTM 01-05 guidelines, we take the onus off you and provide a professional, affordable and comprehensive evaluation of the steps you need to implement to move from Essential Requirements towards Best Practice. We will undertake a full survey and supply you with a professional CAD drawing showing various options, whilst outlining a proposal including all works to be carried out, to enable you to visualise your new layout before you purchase it.

Maintenance

One of the key aspects to maintaining a professional and compliant dental practice is the regular servicing and maintenance of all your dental equipment. BCAS Biomed offers a comprehensive all-round service package to incorporate ALL equipment found in the modern dental suite. We offer a range of service levels, designed to cater to every budget. These include:

- ✓ Total Support
- ✓ Preventative Support
- ✓ Reactive Support
- ✓ Flexible Support

All contracts have scheduled dates for pre-planned maintenance to be carried out, ensuring access to equipment during downtime and saving our customers money through reducing unnecessary callouts. We offer servicing and maintenance capabilities on the entire spectrum of equipment within the dental practice, including:

- Dental chairs
- Dental lights
- Compressors
- X-ray machines
- Sterilisers & autoclaves
- Ultrasonic baths
- Washer-disinfectors

Supply

With the new HTM 01-05 guidelines now in place, it is more important than ever that the decontamination equipment you install is both compliant and is correctly installed. BCAS Biomed works with all leading OEMs to ensure that the procurement process is managed in a professional and efficient manner on your behalf. Our approach is simple, straightforward and saves you time and money, by providing:

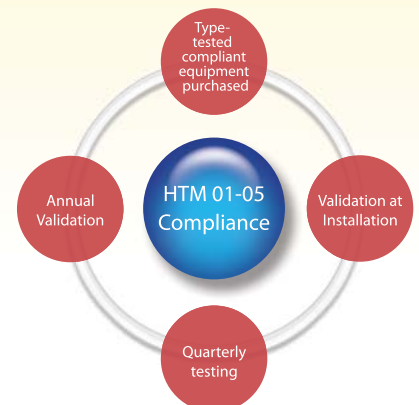

- ✓ **ONE** fully comprehensive **SURVEY** of your individual needs, budget and throughput of patients.
- ✓ **ONE** tailor-made **PROPOSAL** and project plan with various options for you to choose from, including:
 - Sterilisers & autoclaves
 - Washer-disinfectors
 - Ultrasonic baths
 - Reverse Osmosis water units
 - Softeners
 - Inspection lamps and magnifiers
- ✓ **ONE** purchase **ORDER** from you for all your equipment, cabinetry and building works saves you time and money.
- ✓ **ONE** dedicated **PROJECT** manager means you only talk to **ONE** person, ever.
- ✓ **ONE** comprehensive **TRAINING** pack to cater for all your staff CPD training needs.

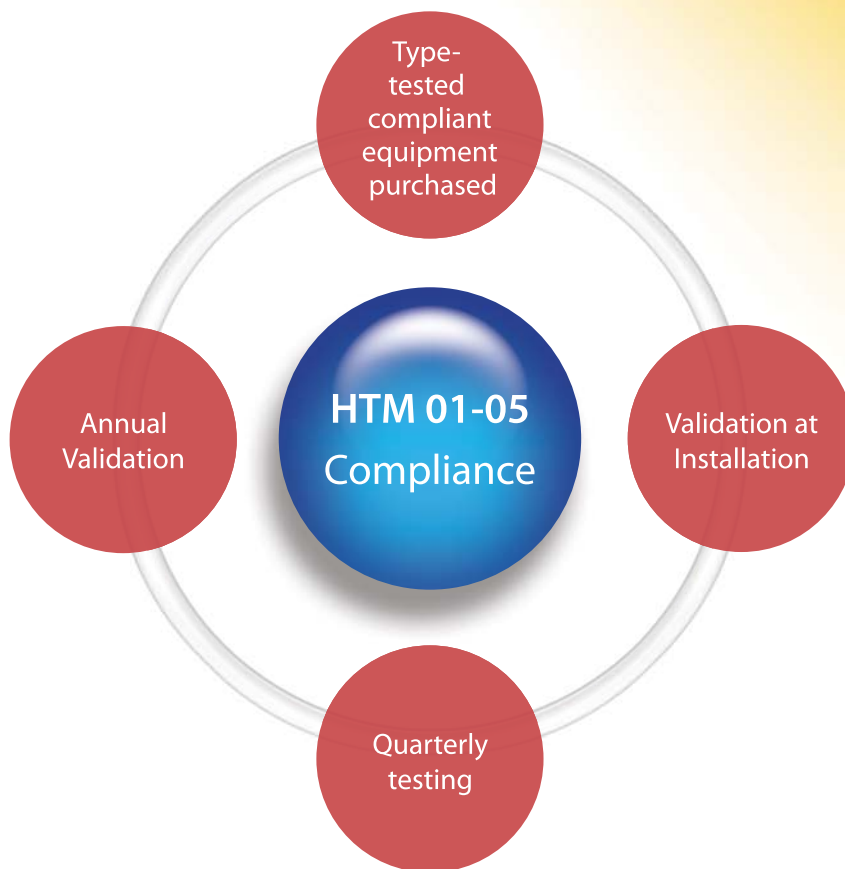

All of the equipment we supply has been type-tested to guarantee compliance with HTM 01-05 and will ensure that your facilities are future-proof.

Validation

Compliance with HTM 01-05 and continued registration with the CQC is dependent upon a rigorous and certified validation and testing regime on all decontamination equipment. This validation is carried out by certified engineers at predetermined periods in accordance with 01-05. The guidelines have been upgraded to incorporate all previous standards and regulations as well as OEM recommendations. It is very important that the correct validation protocol is followed. BCAS Biomed operates a number of validation contracts on various equipment, offering a range of tailor-made solutions to ensure that your equipment is compliant 100% of the time, throughout its lifecycle. Our methods are simple, proven and cost-effective.

- ✓ One **CERTIFIED** company tests and validates **ALL** your equipment – reduces downtime.
- ✓ Latest testing and reporting software utilized for full **TRACEABILITY**.
- ✓ Any **MAINTENANCE** that is required is carried out at the time of validation, saving you time and money.
- ✓ Validation logbooks are updated and **MONITORED**, and additional training issued to end-users if required.
